M.S Mohamed Jeseer

Junior Quantity Surveying Civil / MEP

HND in Quantity Surveying | Diploma in IT

+94 75 450 6100 | jaseermohamed86@gmail.com | Sri Lanka (*Open to relocation to UAE)*

Professional Summary

Quantity Surveying graduate with practical **MEP site exposure** and **commercial project-based** experience in **civil and MEP** work on a **multi-building industrial project**. Familiar with **Quantity take-off, Master BOQ analysis, interim payment review (IPA/IPC), variation assessment and contractor adjustment registers.** Skilled in drawing-quantity measurement using **AutoCAD, Revit, PlanSwift, Excel** and NRM2, POMI measurement Standards to reviewable Excel measurement records. Fluent in English and Tamil. Seeking a Junior QS role in the UAE to develop contract administration and cost control capability.

Professional Experience

Internship – MEP Installation ***CH Engineering, Colombo | Jul 2025 – Jan 2026***

- Supported installation of MEP systems and tracked materials on site, giving practical insight into how measured quantities relate to work done on site.
- Read MEP construction drawings for layout and routing; gained exposure to MEP take-off and BOQ preparation.
- Built practical understanding of quantity take-off, material take-off, and BOQ preparation through direct MEP site

Project-Based QS Experience

Quantity Surveying Support – Industrial Project ***CEER Automotive Supplier Park***

- **Master BOQ:** Supported review and analysis of the Master BOQ across five factory buildings, checking structural, architectural and MEP items against drawings.
- **Payments:** Reviewed Interim Payment Applications (IPA) and Interim Payment Certificates (IPC), building working knowledge of progress valuation and payment certification.
- **Variations:** Assessed contractor variations by comparing submitted quantities with drawings, BOQ items and consultant recommendations.
- **Adjustments & VE:** Worked with contractor adjustment registers and value engineering proposals, comparing submitted quantities against consultant recommendations.
- **Take-off:** Performed drawing-based take-off for structural, architectural and MEP works using NRM2 principles.

MEP Quantity Take-Off Practice & Civil Quantity Take-Off Practice

- Prepared MEP BOQ sections to POMI from AutoCAD and PDF drawings.
- Prepared BOQ information for tender-stage cost estimation and quantity-based cost review.
- Applied basic cost estimation, cost control checks and NRM and POMI measurement rules for quantity take-off.
    - **Addullah Al Romaihi Villa**
    - **DEVELOPMENT OF ISF CAMP AT AL DUHAIL ZONE 30 - BUILDING 30J STATE OF QATAR**
    - **CENTRAL DOHA & CORNICHE BEAUTIFICATION PROJECT**
    - **PROPOSED 3B+G+10 RESIDENTIAL APARTMENT BUILDING**

Academic Qualification

- **Higher National Diploma (HND) In Quantity Surveying** - Ceylon Open Campus
- **Diploma In Information Technology (Level 03)** - Esoft Metro College

Certification & Memberships

- **NOCN Certificate Verification (NOCN) –** No. 4879075

Technical Skills

- **Software :** AutoCAD, Revit, Planswift, Microsoft Office
- **Standards :** NRM2, POMI, CESMM3, FIDIC

Highlighted Skills

- Quantity Takeoff
- Contract Administration
- Procurement Knowledge
- BOQ Preparation
- Subcontractor Payment
- Interim Payment Certificates (IPC)
- Cost Estimation
- Interim Payment Applications (IPA)
- Assess Claim and variation

Professional Skills

- Analytical & Logical Thinking
- Teamwork & Coordination
- Time Management
- Problem-Solving Ability
- Communication Skills
- Adaptability & Quick Learning

Key Responsibilities

- Interpret architectural, structural, and MEP drawings to measure quantities and identify scope requirements.
- Prepare quantity take-off sheets, material take-offs, and Bills of Quantities (BOQs) using applicable measurement standards, including NRM2 and POMI.
- Support quantity-based cost estimation, rate analysis, pricing schedules, and tender documentation.
- Assist with reviewing supplier and subcontractor quotations, comparing rates, and preparing commercial comparison records.
- Support progress measurement and review Interim Payment Applications (IPA) and Interim Payment Certificates (IPC).
- Compare quantities against drawings and BOQ items to support variation assessments and maintain accurate change records.
- Support the review of project costs, committed expenditure, and quantity discrepancies to identify potential cost implications.
- Assist with site measurement, material tracking, and verification of quantities against drawings and project records.
- Maintain organized quantity records, BOQ comparison sheets, measurement records, and supporting commercial documentation using Microsoft Excel.
- Coordinate quantity-related information with site and project teams and support quantity comparisons for potential cost-saving opportunities.

Professional Skills & Core Competencies

- Highly Proficient **in Microsoft Office, AutoCAD, Revit and PlanSwift** for quantity take-off and drawing analysis.
- Familiar with **FIDIC, POMI, NRM2, and CESMM** and standard forms of Conditions of Contract.
- Fluent in **writing, reading, and speaking skills** in English Language.
